Applications :

- Penstocks.
- Supply lines.
- Small tunnel.
- Each circular element with 2-3 m diameter.
- Round or rectangular galleries.

Technical details :

- Can be mounted hydraulically or pneumatically.
- Can work with two saws.
- Only one box for the rotation and the saw.
- Ensured and tested circular motion.
- Depth of cut from 0 to 50 cm.
- Can be used for other purposes, not only sawing.

Main advantages of this system :

- Adaptable 2-3 m diameter.
- Easy to set up and transport.
- Compact.
- Quick to assemble and dismantle.
- While working, easy to move through removables casters
- Easy to use
